The World Deserves A Better Projector

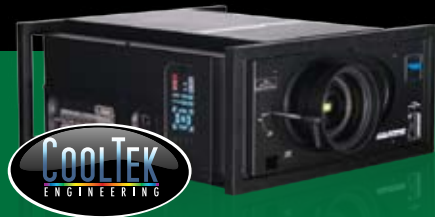

Efficient, Powerful, Responsible

Digital Projection International is proud to offer the broadest and most efficient line of DLP® displays available today. Our projectors create precise imagery and deliver powerful performance - from 1,000 to 30,000 ANSI lumens - while utilizing our exclusive CoolTek™ thermal management systems to assure vital components run coolly, efficiently and quietly - as low as 35dB, depending on the model.

The CoolTek™ design philosophy also guides our use of the highest efficiency lamps in all our rugged projectors, resulting in smaller and lighter models that generate far less heat and consume far less power per lumen, while at the same time assuring unprecedented lamp life. When considered in total, DP's CoolTek™ innovations result in the lowest long-term cost of ownership for our customers, as well as the smallest environmental footprint for the community at large.

Discover the remarkable benefits of Digital Projection - and bring a better projector into *your* world.

TITAN 1080p-500: 6,000 Lumens, 2,000:1 Contrast, <42dB, 59 Lbs.

Deliver The Experience

TITAN Reference 1080p
Full 1080p Resolution
For amazing cinema experiences
on 10 - 20 foot screens

For over ten years, Digital Projection International has delivered the very best projection technology to Hollywood and the entire entertainment industry. In 1998, DPI earned two Emmy® Awards for Outstanding Achievement in Engineering Development. We remain the first and only projector manufacturer to win the coveted award.

You can own the precision displays relied on by Hollywood studios, exclusive film festivals, celebrity screening rooms, and major televised events, for your home entertainment. DPI's complete line of DLP® projectors offers the superior brightness, astonishing color depth and high-contrast imaging demanded by the most elite home cinemas.

Our history speaks for itself. Our products, legendary.
You deserve the best.
