

About Digital Projection International

Founded in 1989, Digital Projection International (DPI) has been instrumental in the development and application of Digital Light Processing™ technology by Texas Instruments for projection systems. DPI introduced the world's first 3-chip DLP™ projector in 1997, and has since delivered expert system engineering and world-class customer services, thus maintaining its position as a digital imaging pioneer.

DPI's groundbreaking projection research and development has garnered the admiration of industry professionals around the world. This has included many awards, including two Emmy® Awards for Outstanding Achievement in Engineering Development by the Academy of Television Arts and Sciences. DPI remains the first and only projector manufacturer to win the coveted award.

Today, DPI manufactures and distributes an extensive line of ultra high-performance 3-chip and single-chip DLP projection systems. These projectors are the reference standard for demanding applications such as large-venue, live-event staging, Fortune 5000, Homeland Security, education, medical and scientific research, command and control, digital cinema, commercial entertainment, religious venues and elite home cinema.
