News Release – For Immediate Release

Meggitt Training Systems Chooses Digital Projection for EST II Program

ATLANTA, GA – (November 23, 2015) – Meggitt Training Systems, the supplier of the US Army’s next generation virtual small arms trainer, EST II (Engagement Skills Trainer), has chosen Digital Projection International (DPI) as its subcontractor for the projectors to be delivered with EST II systems. After careful consideration and testing of many different products from projector manufacturers, Meggitt determined the E-Vision 6800M from Digital Projection was the projector of choice for the EST II program.

Program Manager for EST II at Meggitt Training Systems, Mark Parr, stated, “The E-Vision 6800M provided the best performance and optical quality at a good value compared to the other projectors tested by our team. During the selection process, we received excellent support from all levels of the DPI organization. High-performing projectors for the EST II program are a necessity, and Digital Projection International’s E-Vision 6800M was able to meet the criteria to support the US Army’s training needs in the years to come.”

The EST II program is a five-year Indefinite Delivery/Indefinite Quantity (IDIQ) contract from the US Army Program Executive Office for Simulation and Training (PEO STRI), which covers nearly 1,000 new and upgraded systems and simulated weapons for US Army facilities worldwide.

DPI will demonstrate its suite of simulation projection solutions in booth #970 at I/ITSEC 2015 in Orlando, Florida, from November 30 – December 4, 2015.

– END –

About Meggitt Training Systems
Meggitt Training Systems is the leading supplier of integrated live fire and simulation weapons training systems supporting military, defense and security forces, federal and international law enforcement agencies, large metropolitan training academies, thousands of police departments, ammunition and firearms manufacturers and commercial shooting range owners.

Headquartered in Suwanee, GA in a 235,000 square foot facility, Meggitt Training Systems employs over 400 people at facilities in the United States, Australia, Canada, Netherlands, Singapore, United Arab Emirates and United Kingdom.

Meggitt Training Systems is a business unit in Meggitt PLC's Equipment Group division.

About Digital Projection International

Founded in 1989, Digital Projection International (Digital Projection) has been instrumental in the development and application of Digital Light Processing™ technology by Texas Instruments for projection systems. Digital Projection International introduced the world’s first 3-chip DLP® projector in 1997, and has since delivered expert system engineering and world-class customer services, thus maintaining its position as a digital imaging pioneer.

Digital Projection International's groundbreaking projection research and development has garnered the admiration of industry professionals around the world. This has earned the company many awards, including two Emmy® Awards for Outstanding Achievement in Engineering Development by the Academy of Television Arts and Sciences. Digital Projection remains the first and only projector manufacturer to win the coveted award.

Today, Digital Projection International manufactures and distributes an extensive line of ultra high-performance 3-chip and single-chip DLP® projection systems. These projectors are the reference standard for demanding applications such as large-venue, live-event staging, fortune 5000, education, medical and scientific research, command and control, digital cinema, commercial entertainment, worship and elite home cinema.
